Programming with spreadsheets. (K programovaniu cez tabul'kové kalkulátory.)

Mat. Fyz. Inform. 11, No. 9, 562-568 (2002).

The author finishes his reflection on spreadsheets as suitable counting tools. He generalises the illustrated approach: Solve a problem using a spreadsheet, then make a program which will generate the same output which can be seen in the sheet. Compare your solutions.
