

ZMATH 2003a.00659

Berry, Scott M.

A statistician reads the sports pages: How ferocious is Tiger?

Chance 14, No. 3, 51-56 (2001).

The probability that the known golf player Tiger Woods will win a golf tournament is discussed. The model described in this article is known as a hierarchical normal model. The data used are analyzed using a Bayesian analysis.

Classification: K55
