

ZMATH 2003a.00092

Safford-Ramus, Katherine

A review and summary of research on adult mathematics education in North America (1980-2000).

Fitzsimons, Gail E. et al., Adult and lifelong education in mathematics. Adult Education Resource and Information Service (ARIS), Melbourne (ISBN 1-876768-27-4). 85-95 (2001).

The field of mathematics education in the United States has experienced considerable growth and change over the past twenty years. This paper examines the literature of adult mathematics education during the same time period. The researcher wished to determine whether trends similar to those in mathematics education pedagogy would manifest themselves in andragogical research.
