Vithal, Renuka

Differentiation, equita and mathematics education.

Neubrand, Michael, Beiträge zum Mathematikunterricht. Vorträge auf der 34. Tagung für Didaktik der Mathematik. Franzbecker, Hildesheim (ISBN 3-88120-314-1). 59-68 (2000).

The concepts of equity and differentiation discussed in this article emanated from empirical data produced in a grade 6 mathematics classroom in a primary school in South Africa that has both "Indian" and "African" students. The authoress concludes that equity and differentiation confront and oppose but also support and need each other within the difficult living condition of the arranged situation.
