

ZMATH 2002d.03049

Helms, Janel E.; Hinks, Matthew J.; Goodman, Michelle V.; Leiby, Shelly R.; Verna, Luke J.; Wetzel, Cheryl A.

Transportation.

Teach. Child. Math. 6, No. 7, 452-453 (2000).

The 'Math by the Month' activities are designed to appeal directly to students. Students may work on the activities individually or in small groups. No solutions are suggested so that students will look to themselves as the mathematical authority, thereby developing the confidence to validate their work. This month's activities focus on transportation. Students are involved in various forms of transportation in the world around them. The activities invite students to investigate transportation through data collection, geometry, and measurement. (orig.)
