Dryburgh, Heather

Underrepresentation of Girls and Women in Computer Science: Classification of 1990s Research.

J. Educ. Comput. Res. 23, No. 2, 181-202 (2000).

Discusses the decline in the number of female computer science graduates and presents a categorization by educational stages of the research into this decline as well as an evaluation of the generalizability of findings to broader contexts. Show that the most extensive research is done at the post-secondary stage. (Contains 53 references.) (ERIC)

Classification: Q45
