Pedagogika, No. 4, 340-364 (2000).

In the year 2000 the journal Pedagogika celebrates fifty years of its existence - it has been published continuously since the year 1951. As it is the main periodical with a scientific character in Czech pedagogy it has served not only as a source of information for researchers and practitioners but has reflected the development of Czech educational theory and research as well. The present paper deals with an analytical description of the development of the journal during the period 1951-1999.
