Investigação em educação matemática: Implicações curriculares.

, (ISBN 972-8353-79-0). 356 p. (1998).

The book constitutes a synthesis of research in mathematics education in Portugal in the period 1970-1996. It discusses curriculum evaluation studies and innovative experiences, their methodologies and materials regarding different mathematical topics. It takes into view students as well as teachers. It ends with the implications of these studies for further research and curriculum development.

Classification: B10
