Initial teacher training National Curriculum for secondary mathematics. Annex G of DfEE circular 4/98.

,. 18 p. (1998).

The initial teacher training (ITT) National Curriculum for secondary mathematics specifies the essential core of knowledge, understanding and skills which all trainees on all courses of ITT for secondary mathematics must be taught and be able to use in their teaching. It should be read alongside the Standards for the Award of Qualified Teacher Status and the National Curriculum for the use of ICT (Information and Communications technology) in subject teaching. The curriculum is in three sections: (Section A) Pedagogical knowledge and understanding required by trainees to secure pupil's progress in mathematics; (Section B) Effective teaching and assessment methods; (Section B) Trainee's knowledge and understanding of mathematics.
