

ZMATH 1998e.03147

Ensley, Douglas E.; Fiorini, Gene R.

Increasing student activity levels.

PRIMUS, Probl. Resour. Issues Math. Undergrad. Stud. 8, No. 2, 175-183 (1998).

The level of student activity in a mathematics department at an undergraduate institution is an important gauge of academic atmosphere within the program. This article outlines some practical advice for improving the level of student activity through properly directed faculty activity. (Orig.)
