

ZMATH 2015b.00478

Balaguer, Mark

A guide for the perplexed: what mathematicians need to know to understand philosophers of mathematics.

Math. Intell. 36, No. 2, 3-8 (2014).

From the introduction: This note is a guide for mathematicians who don't know much about the philosophy of mathematics – a guide that explains how to read philosophers of mathematics. My hope is to make clear for mathematicians what philosophers of mathematics are really up to and, also, to eliminate some confusions.
