Relation objects and different representative registers: cognitive difficulties and obstacles.
(Objetos relacionales y registros representativos distintos: dificultades cognitivas y obstáculos.)

Uno 4, No. 15, 63-76 (1998).

In this paper we consider the results of a research about the identification, from students of different school levels, of different significants of the same meaning, when this one is a binary relation and the significants are obtained by using different representative registers. (orig.)
