

**ZMATH 2015b.00011**

**Krech, Ireneusz**

**On rotations of geometrical.**

Obz. mat. fyz. inform. 43, No. 3, 21-24 (2014).

Summary: The paper presents some original solutions to a certain problem on rolling coins (circles) derived from a book by *D. G. Wells* [The Penguin book of curious and interesting puzzles. New York, NY: Penguin Books (1992; Zbl 0925.00013)], and also proposes several generalizations of the problem.

*Classification:* A20 A80

*Keywords:* mathematical problems; puzzles; circles
