Betti, Renato

Ideas on education: what has the "Via Emilia" got to do with it? (Idee sulla didattica: che cosa c'entra la via Emilia?)

Let. mat. Pristem, No. 25, 38-42 (1997).

The author collects here his ideas on mathematics education. The title refers to the fact that the old Roman "via Emilia" is better seen in satellite photographs than the nearby modern highway – and this because of the "relations with the context" established during many centuries.
