

ZMATH 1998c.02209

Moss, Cyril; Kenwood, Michael

A-level mathematics. Exam questions and answers.

Longman, Harlow (ISBN 0-582-30389-3). 140 p. (1997).

The book offers a bank of practice questions complete with fully-worked solutions and Examiner's marking schemes, giving students all the practice they need in the build-up to their exams. Timed practice papers are also included, encouraging students to practise completing questions under exam-like constraints. Contents: Preparing for the examination; Topic areas, worked examples and practice questions (Algebra, Sequences and series, Coordinate geometry, Functions, Trigonometry, Differentiation, Integration, Numerical work, Mathematics of uncertainty, Vectors, Mechanics, Random variables and probability distributions); Hints, outline solutions and answers; Timed practice papers with answers (Question papers for Pure Mathematics, Mechanics, Statistics).

Classification: U40
