

ZMATH 1998b.01148

Schattschneider, Doris

Geometry and symmetry.

Pythagoras (Pretoria), No. 44, 9-20 (1997).

Teaching about symmetries (at all levels); questions, problems and tasks; symmetry analysis (what symmetries can a finite design have?); classification of quadrilaterals by symmetry; making symmetry and finite designs; periodic border designs; symmetry and patterns, tessellations; tiling with polyominoes.

Classification: G50
