

ZMATH 1998f.04084

Hoare, G.T.Q.

A survey of mathematical logic. Pt. 2: post-1931.

Math. Gaz. 80, No. 488, 286-297 (1996).

A whirlwind tour. Most of the discussion centers around Gödel's incompleteness theorems and recursion/computability. A brief nod is also given to nonstandard analysis and to Gödel and Cohen on AC and GCH. (ZfM)

Classification: E35 I95

Keywords: goedel incompleteness theorem; recursive functions
