Richardson, Kathy

Math Time: The learning environment for K-2 mathematics..What does it look like? Vol. 1. Educational Enrichment, Norman, OK (ISBN 1-888117-00-1). VHS video cassette. (1995).

This video is designed to present teachers with an opportunity to consider what is important when creating a learning environment for mathematics in Kindergarten through second grade classrooms. Those viewing the video will see what decisions must be made when setting up a classroom where children are actively engaged. They will look at the physical environment, the kinds of tasks presented to the children and the setting that supports the development of mathematical understanding. The guide outlines an inservice session intended to get teachers involved in a discussion about this learning environment in light of their own experiences.
