

ZMATH 1996d.02341

Van Dyke, Frances

Activities: A Visual Approach to Deductive Reasoning.

Math. Teach. (Reston) 88, No. 6, 481-86,492-94 (1995).

Provides a teacher's guide and activity sheets designed to introduce students to three patterns of reasoning in inferential logic. Students learn to construct arguments from diagrams and, given an argument, illustrate the argument with a Venn diagram, then study the diagram to see if the argument is valid or invalid. (ERIC)

Classification: E30
