

ZMATH 1996c.01745

Norris, L.; Scudder, B.

Self-access numeracy.

National Extension College, Cambridge (ISBN 1-85356-551-2). 184 p. (1995).

Containing over 150 skills sheets and practical activities, Self-Access Numeracy is designed to help adult learners in a class or workshop situation develop confidence in using and applying mathematical concepts. It is aimed at those who already have some basic number concepts, such as simple measuring and calculating skills, but who wish to develop these further. The following topics are dealt with: cfractions, decimals, proportion, percentages, measurements, shapes and angles, graphs and charts, volumes and areas.

Classification: F48
