

ZMATH 1996b.00882

Littler, G.H.; Taylor, V.

Teaching strategies in mathematical education courses for student teachers.

Hejný, M. et al., International Symposium 'Elementary Maths Teaching' (SEMT 95). , (ISBN 80-7184-038-6). 133-137 (1995).

Students - future teachers were presented by games and investigations which can be used in school mathematics. This new teacher-training programme was used in order to change the attitudes of the students to one which is more positively oriented to mathematics and a little less fearful of the subject. Some reflections on this project are presented. (PedF UK)
