

INTRODUCTION OF KLAUS HULEK

On April 1 I took over the office of Editor-in-chief of Zentralblatt MATH. I would like to thank Gert-Martin Greuel for his excellent work and his outstanding commitment. Bernd Wegner and Gert-Martin Greuel have transformed zbMATH from a printed periodical to a modern database. I will strive to continue their work and hope to make zbMATH an even more useful tool providing reliable and comprehensive information serving the specific needs of the mathematical

community. A few words about myself: I am professor of mathematics at Leibniz Universität Hannover and my field of research is algebraic geometry. From 2005–2014 I was Vice President for Research of Leibniz Universität and during much of this time I also represented the German Universities at the Research Policy Working Group of the European University Association (EUA) – an experience which I hope will also be useful in my work for zbMATH.

REVIEW SUBMISSION INTERFACE

We recently updated the Review Submission Interface to provide some new and much requested functionality. Changes include:

1. New Login Scheme

Instead of providing a document number, you can now more safely and more easily log in by entering your Reviewer ID and an email address associated with your account. An authentication link will be sent to you via email. If you do not know which email address corresponds to your reviewer account, please contact editor@zbmath.org.

Alternatively, you can set a password for your account using the menu on the top right once you are logged in.

2. MSC Chooser and Preview Box

When you start entering an MSC into the classification field, a list of possible matches will be displayed, enabling you to directly select one from the list. Entering an English word will show a list of MSCs which have that word in their description. Moreover, when you enter your review, a preview box on the right-hand side will show a preview of your review as you type it.

3. Autosave Functionality

Everything you enter into the review submission form will be saved immediately. Thus you can stop writing your review at any point and continue at a later time. Once you are finished writing your review, please click the “Submit Review” button at the bottom of the form.

If you encounter any problems while using the review submission interface, please do not hesitate to contact editor@zbmath.org.

ZBMATH RECEPTION AT THE 7ECM BERLIN

Next week, the 7th European Congress of Mathematics will take place in Berlin. We would like to cordially invite you to join our reception for reviewers, partners and friends of zbMATH.

The reception will take place on July 19, 2016, between 12:00 and 14:00 hrs. at Wyndham Berlin Excelsior, Hardenbergstraße 14, which is close to Technische Universität Berlin:

2016 ZBMATH SURVEY

We would much appreciate your feedback on the developments in the zbMATH database during the last four years. It would be great if you could spend about 5-10 minutes to answer the EMS questionnaire on zbMATH available at <https://de.surveymonkey.com/r/zbMATH-survey>.

ERRATUM

In the text version of the previous Newsletter, a “/” was missing at the end of the link to the citation matching tool. The correct link is <https://zbmath.org/citationmatching/>.
